

Layers in Patwin: Double case marking and the Miwok substrate

Lewis C. Lawyer

University of California, Davis

January 7, 2016

Introduction

- i. Patwin (pwi, Wintuan, California) has **double case marking**:
Two case suffixes may occur on a single nominal.
- ii. The pattern of double case marking reflects a Miwok substrate.
- iii. Patwin double case marking is different from better-known systems of multiple case marking.

Patwin

- Wintuan language family
(Penutian stock?)
- Critically endangered
(both Patwin and Wintuan)
- Data: Archival
- Wintuan languages from north
(plant & animal names, Whistler 1977)

Patwin & Wintuan geographically.

Map derived from Heizer (1978).

Patwin cases

Grammatical cases:

subjective	SBJ	-∅
objective	OBJ	- <i>t</i> ~ - <i>s</i> ~ - <i>ma</i> ~ ...
possessive	POSS	- <i>nomin</i> ~ - <i>no</i> ~ ...

Semantic cases:

comitative	COM	- <i>da</i>
instrumental	INS	- <i>sin</i> ~ - <i>tin</i> ~ ...
locative	LOC	- <i>ta</i> ~ - <i>tin</i>
allative	ALL	- <i>tuka</i>
ablative	ABL	- <i>ti</i> ~ - <i>na·k</i>
prolative	PROL	- <i>na</i>

Patwin double case marking

Patwin has productive double case marking on kinship terms, nouns, and pronouns (examples follow).

The basic pattern is:
STEM-(OBJ)-case

Patwin double case marking: On kinship terms

On kinship terms and *ʔew* 'this', objective case *-t* optionally precedes possessive case suffixes.

(The objective case suffix is semantically vacuous in this context.)

- (1) a. *ʔuy-ne-n* *lu-m-ta*
 3-mother.SBJ die-PART
 'His mother died.' (Bright NB:1.G118, SG)
- b. *ʔuy-ne-t* *t'ihī-tu-m*
 3-mother-OBJ ask-SBJV
 '(They) asked their mother' (Radin MS:78/203, AL)
- c. *ʔuy-ne-n-no* *di-!a*
 3-mother-POSS home-LOC
 'to her mother's home' (Bright NB:10.DL113, DL)
- d. *ʔuy-ne-t-no* *no-p*
 3-mother-OBJ-POSS meat
 'their mother's flesh' (Radin MS:83/208, AL)

Patwin double case marking: On nouns

On nouns, objective case *-ma* optionally precedes semantic case suffixes.
(The objective case suffix is semantically vacuous in this context.)

- (2) a. [...] *t^hasi·* *muhi tuyu-m*
 mink.SBJ sing stop-SBJV
 ... Mink stopped singing. (Radin MS:11/146, AL)
- b. [...] *t^hasi--ma* *doyi ?uno pe-spe-s*
 mink-OBJ give his property
 '... give Mink his property.' (Bright NB:9.DL78, DL)
- c. [...] *harme-m* *t^hasi--tuka*
 take-SBJV *mink-ALL*
 '... and took it to Mink.' (Radin MS:5/142, AL)
- d. [...] *ha-rme-m* *t^hasi--ma-tuka*
 take-SBJV *mink-OBJ-ALL*
 '... and took them to Mink.' (Radin MS:13/148, AL)

Patwin double case marking: On pronouns

On pronouns, objective *-t~s* optionally precedes semantic case suffixes.
(The objective case suffix is semantically vacuous in this context.)

- (3) a. *mi* *p^heča·yu-n*
 2SG.SBJ stant-RPAST
 You stood. (Bright NB:1.G148, SG)
- b. *wini-s* *ču* *mi-s*
 see-FIN 1SG.SBJ 2SG-OBJ
 I see you. (Bright NB:3.IM24, IM)
- c. *boh-le* *mi-s-da*
 be-1EXCL.HORT 2SG-OBJ-COM
 I'll stay with you. (Whistler NB:F29, JR)
- d. *pi* *wi-ta* *mi-da* *har-ta*·
 that man.SBJ 2SG.COM go-Q.PAST
 Did that man go with you? (Whistler NB:G49, HL)

Patwin double case marking

Double case on Proto-Wintuan in possessive kinship terms and pronouns:
**-t-n(o)* ‘-OBJ-POSS’ (Whistler 1980; Shepherd 2005)

- Patwin reflex: *-t-no* (kinship terms and *?ew-t-no* ‘this-OBJ-POSS’)
- Wintu reflex: *-t-un* (kinship terms and 3SG pronouns)

Double case for semantic cases is a [Patwin innovation](#).

Miwok substrate

Whistler (1977) demonstrates Miwok substrate for Patwin, using plant and animal names.

Miwok substrate

Whistler (1977) demonstrates Miwok substrate for Patwin, using plant and animal names.

We would expect also vestiges of Miwok grammar. . .

Miwok substrate

Whistler (1977) demonstrates Miwok substrate for Patwin, using plant and animal names.

We would expect also vestiges of Miwok grammar. . .

Sierra Miwok and Plains Miwok have productive, obligatory double case marking in some semantic cases (see Callaghan 2014).

They co-occur with nominative *-ʔ*, and possibly with accusative *-j*:

- (4) a. Proto Sierra Miwok (Callaghan 2014:181)

his·ik-my-ʔ

skunk-LOC-NOM

- b. Southern Sierra Miwok (Broadbent 1964:52)

haj·e-m·-j

close.by-ABL-ACC

‘for a little while’

Double case

Two types of double case marking in the literature:

- Suffixaufnahme
- case layering

Suffixaufnahme

Suffixaufnahme:

- two or more case suffixes
- both have a semantic/functional contribution

Examples:

- (5) a. Old Georgian (oge, Kartvelian; Plank 1995:28)

saxel-ita *mam-isa-jta*
 name-INS father-GEN-INS

'with the father's name'

- b. Martuthunira (vma, Pama-Nyungan, Dench and Evans 1988:7)

tharnta-a *kupuyu-marta-a* *thara-ngka-marta-a*
 euro-ACC little-PROP-ACC pouch-LOC-PROP-ACC

'[I speared] a euro with a little one in its pouch'

Case layering

Case layering:

- two or more case suffixes
- innermost suffix is semantically vacuous
- outer suffixes derive from adpositions (Kulikov et al. 2006)
- best known in Indo-Aryan languages

Example: Marathi (mar, Indo-Aryan, India; Masica 1991:233)

stem	<i>vimān</i>	‘plane’
“oblique”	<i>vimān-ā</i>	
dative	<i>vimān-ā-lā</i>	‘to the plane’
instrumental	<i>vimān-ā-ne</i> [—]	‘by plane’

Case layering

Comparison of Patwin and Indo-Aryan case layering:

	Patwin	Indo-Aryan
source of semantic case suffixes	not adpositions	adpositions
source of case layering	a) analogy to older case layering b) Miwok substrate	adpositions grammaticalize to suffixes

Conclusion

- Patwin nominals may take 2 case suffixes.
- This is case layering, and not Suffixaufnahme.
- Patwin case layering reflects the Miwok substrate.
- Patwin case layering has a different historical source than the better-known Indo-Aryan case layering.

Thanks!
